LEADER, Great Falls; The Leader Co., Pub.; Established 1888; Machine composition; eight 12-em columns 20 inches deep.

REGISTER, Great Falls, Denver Catholic Register, Pub.; Established 1930; Machine composition; eight 12-em columns 20 inches deep. Copy deadline Sunday.

CHOUTEAU COUNTY

MOUNTAINEER, Big Sandy; C. C. Mills, Pub.; Established 1911; Machine composition; six 13-em columns $19\frac{1}{2}$ inches deep. Copy deadline Tuesday.

REVIEW, Geraldine; W. W. Webb, Pub.; Established 1914; Machine composition; six 13-em columns $19\frac{3}{4}$ inches deep. Copy deadline Tuesday.

RIVER PRESS, Fort Benton; Joel R. Overholser, River Press Publishing Co.; Established 1880; Machine composition; six 13-em columns $19\frac{3}{4}$ inches deep. Copy deadline Tuesday.

the first of these is the fact that the system is not self-sufficient. It is dependent on the external world for its raw materials and for its energy. The second is that the system is not self-organizing. It is dependent on the external world for its structure and for its function.

The third is that the system is not self-maintaining. It is dependent on the external world for its maintenance and for its repair. The fourth is that the system is not self-replicating. It is dependent on the external world for its reproduction and for its growth.

47

The fifth is that the system is not self-aware. It is dependent on the external world for its knowledge and for its understanding. The sixth is that the system is not self-responsible. It is dependent on the external world for its actions and for its consequences.

The seventh is that the system is not self-determining. It is dependent on the external world for its choices and for its decisions. The eighth is that the system is not self-creating. It is dependent on the external world for its existence and for its future.

The ninth is that the system is not self-destroying. It is dependent on the external world for its destruction and for its end. The tenth is that the system is not self-renewing. It is dependent on the external world for its regeneration and for its rebirth.

The eleventh is that the system is not self-healing. It is dependent on the external world for its recovery and for its restoration. The twelfth is that the system is not self-improving. It is dependent on the external world for its progress and for its development.

The thirteenth is that the system is not self-fulfilling. It is dependent on the external world for its completion and for its fulfillment.

The fourteenth is that the system is not self-sustaining. It is dependent on the external world for its survival and for its continuation. The fifteenth is that the system is not self-perpetuating. It is dependent on the external world for its persistence and for its longevity.

The sixteenth is that the system is not self-protecting. It is dependent on the external world for its defense and for its security. The seventeenth is that the system is not self-defending. It is dependent on the external world for its protection and for its safety.

The eighteenth is that the system is not self-asserting. It is dependent on the external world for its expression and for its manifestation. The nineteenth is that the system is not self-revealing. It is dependent on the external world for its disclosure and for its unveiling.

The twentieth is that the system is not self-expressing. It is dependent on the external world for its communication and for its interaction. The twenty-first is that the system is not self-representing. It is dependent on the external world for its image and for its appearance.

The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

In the second part of the paper, the author discusses the problem of the structure of the nucleus. It is shown that the structure of the nucleus is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

2. The second part of the paper

is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

3. The third part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

4. The fourth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

5. The fifth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

6. The sixth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

7. The seventh part of the paper

is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

8. The eighth part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and its value is determined by the initial condition $f(0) = 1$.

SANDERS COUNTY
